Welcome to OpenMarkets

Australia's most connected digital trading platform

OpenMarkets is a digital trading platform that provides retail investors, traders, advisers, robo-advisers, brokers and financial intermediaries with a suite of innovative brokerage services for trading on the Australian securities markets.

We are an Australian Financial Services licensee (246705) and full market participant of ASX, Chi-X and NSX with trading, clearing and settlement memberships.

We set ourselves apart from other brokers with our digital network, open APIs and open philosophy towards third party integration. Our partners include robo-advisers, online brokers, banks, wealth management platforms and administration providers, who share the same vision for open connectivity to create a new world of possibilities for investors.

Since opening the doors in 2013, our open philosophy has helped us rapidly grow, consistently ranking OpenMarkets in the top 15 brokers in Australia by trading volume.

In 2016, OpenMarkets received a 5-star CANSTAR rating for outstanding value in share trading and ranked #3 in the Deloitte Technology Fast 50. In 2017, we ranked #34 in the AFR Fast Starters List and were finalists in the Platform Innovator of the Year category at the 2017 and 2018 Fintech Business Awards.

It is our collaborative approach, open technology and pioneering attitude that allows us to look beyond tradition and think about what's next - making OpenMarkets the trading platform of the future and ideal partner for the financial services industry.

OpenMarkets
